**DETAILED ACTION*****Priority***

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

***Specification***

2. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

3. The abstract of the disclosure is objected to because it is not limited to a single paragraph. Correction is required. See MPEP § 608.01(b).

4. Claims 1-15 are allowed.

5. The following is an examiner's statement of reasons for allowance:

The present invention provides a device and method for signal processing that can make a file containing code streams of encoded still pictures (such as a JP2 file) and a files containing code streams of encoded moving picture (such as a MJ2 file) compatible relative to each other for the convenience of the user and maintain the compatibility in such a way that the means for reading an MJ2 file

can decode and display a moving picture in addition to a still picture and the means dedicated to reading a JP2 file also can decode an MJ2 file and operate as MJ2 file generating means (specification, page 4, first paragraph). In particular, the new device and method comprise the following features, which the prior art, either taken singly or in combination, does not teach:

- reading the leading first code stream in the first coded file and discarding or disregarding all the first code streams in the first coded file other than the leading code streams (see independent claims 1 and 7);
- generating meta data relating to the code streams of the plurality of frames extracted in said moving image extracting step; and generating a second coded file by combining all the first code streams and the meta data (see independent claim 9).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

6. This application is in condition for allowance except for the following formal matters:

The Abstract is objected for being not limited to a single paragraph.  
Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
